

# DIAMOND WHEELS FOR GRINDING LINING BRICKS

Urdiamant offers diamond wheels for grinding and calibrating lining bricks. Our wheels have proven their excellent performance on machines from producers like e.g. Wassmer, or Lingl. If you need fast delivery and partner that tailors solution to your needs, do not hesitate to reach us!

## SELECT A WHEEL THAT MATCHES YOUR APPLICATION

WHEEL DIAMETER (mm)	BOND TYPE (BASED ON ABRASIVENESS OF GRINDED MATERIAL)	SIZE OF SEGMENTS
650	ZB 2 Low abrasiveness of material	24x10x20 mm
700	ZB 5 Low to medium abrasiveness of material	
750	ZB 7 Medium abrasiveness of material	
900	ZB 13 Medium to high abrasiveness of material	
1100	ZB 12 High to extreme abrasiveness of material	
Wheel's body / core: One-piece Wheel's body: from 7 pcs		

## REAL EXPERIENCE CONFIRMS PERFORMANCE OF OUR WHEELS

Capable to:  
Grind up to 250t  
of bricks\*

Remain in use in  
production up to  
6 months\*

\* Achieved performance might differ due to differences in grinding conditions (abrasiveness, shape of bricks, peripheral velocity of the wheels, etc.)

## VIEW OF THE BRICK PRODUCTION LINE

1) Bricks entering grinding machine on a conveyor belt, 2) grinding area and 3) bricks exiting the machine after being ground
