

NEW

ROCK SNAKE®

DIAMOND
IMPREGNATED
DRILLING BITS

SELECT THE RIGHT TYPE FOR YOUR APPLICATION

| ROCK'S CHARACTER | ROCKS | BIT TYPE |
|------------------|--|----------|
| Highly Abrasive | Sandstone, abrasive quartzite, conglomerate | RS1 |
| Slightly Hard | Hard limestone, dolomitic limestone, schist, serpentine, claystone | RS2 |
| Medium Hard | Gneiss, marble, pegmatite, dolomite | RS3 |
| Hard | Granite, gabbro, andesite, diorite, hornfels | RS4 |
| Extremely Hard | Basalt, massive quartzite, ironstone, rhyolite, taconite | RS5 |

IMPROVE YOUR DRILLING PERFORMANCE

OLD

Irregular
distribution of
diamond grits

NEW

Highly Regular
distribution of
diamond grits

- Lower resistance of drilling
- Higher drilling velocity / speed
- Longer durability of a Drilling Bit

AVAILABLE DIMENSIONS

- Wireline bits: AWL, BWL, NWL, HWL, PWL, SWL
- Suitable also for other bit types, e.g.: T2, T6, B, D, etc.
- Active layer's height (layer with diamond grits): 6 / 9 / 13 / 16 / 20 mm
